

1

Choose the correct link

<https://appdistribution.firebaseio.dev/i/B4GAszxT> for @students.zhaw.ch

<https://appdistribution.firebaseio.dev/i/J5E3YJHD> for @zhaw.ch

2

travellory

for Android

Ready to test this app?

Enter an email address with a students.zhaw.ch domain

3

travellory
for Android

Ready to test this app?

Enter an email address with a students.zhaw.ch domain

- You're in! Check your inbox on your mobile device to get started with testing the app

Powered by
 Firebase App Distribution

This is just a confirmation that you should now get a new e-mail.

4

Open your e-mail client, look for an invitation from "Firebase" and open it. Now you should see "Get setup", just click it.

5

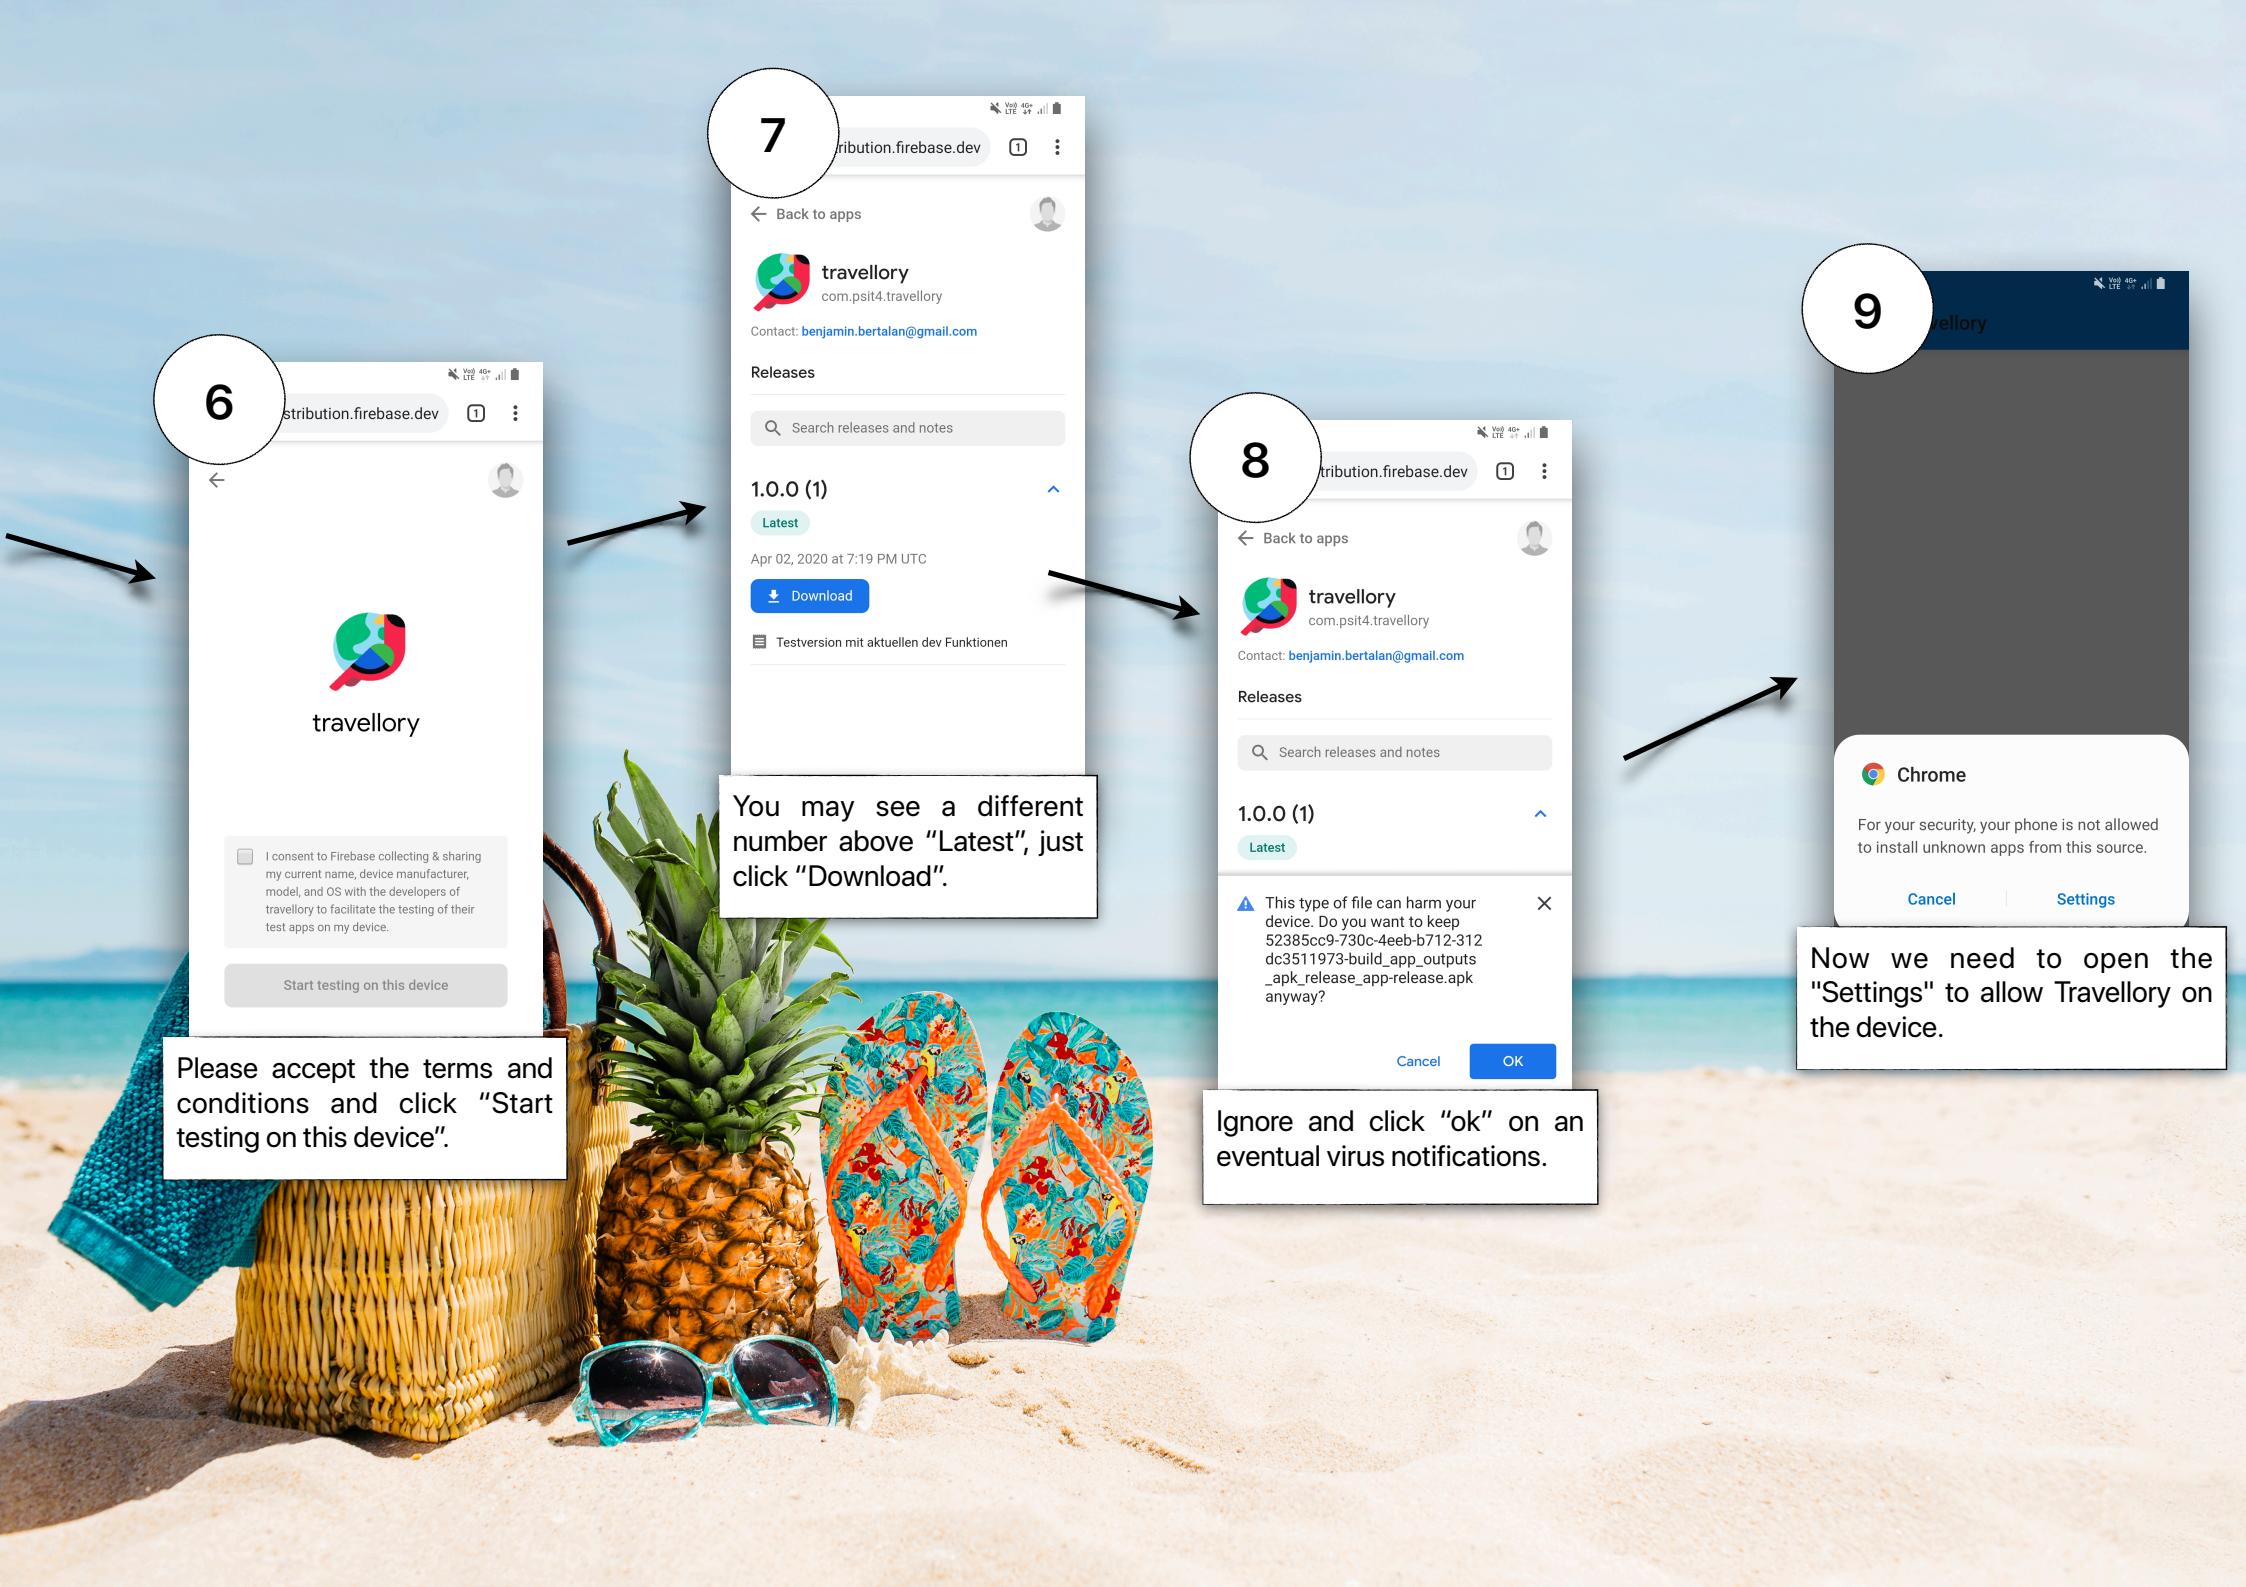

Before you test travellory...

- 1 Sign in to accept your invite
Sign in with any Google account to accept your invitation to test travellory .

Sign in with Google

- 2 Download App Distribution

Now you need to click "Sign in with Google" and enter a valid google account.

6

Please accept the terms and conditions and click "Start testing on this device".

I consent to Firebase collecting & sharing my current name, device manufacturer, model, and OS with the developers of travellory to facilitate the testing of their test apps on my device.
